## DISTRICT CROPPINGS

## And Other Items of Interest in a General Way

Hayling is now in full swing.

There is a scarcity of working men throughout this district.

Sunday, 4 a.m.—Hot! It was only two little kittens at play.

An intelligent boy is wanted at Tin Creek office to learn the printing trade.

Mrs. Patmore and children of Windermere went to Golden last week on a visit to friends.

Get your name on the voters' list at once! Apply at the government offices at Windermere or Wilmer.

Joe Lucas started Thursday across the Rocky Mountains with a haul of horses which he intends selling in the Northwest.

Bishop Dyer held service in St. Peter's church last Sunday, and on Saturday evening held a confirmation service at which eleven persons were confirmed.

Sam Jackson, the travelling tailor, settled on his customers in this district once again this week. Sam is not a better tailor, even though he came from the west. He has been travelling through this country for years and is confident "one of the boys" in every camp in B. C. He measures everything in sight.

Mr. and Mrs. Griffith, Mrs. Hanco, Mrs. Sprague and Mr. Foster rode up from Enderby Sunday and spent the day with Mr. Hanco. They started home in the evening, but about a mile from town Mrs. Griffith's horse backed, threw her, and although she was not injured, she gave a severe shaking up, the party returned to town and remained until the following day.

Frank Cattle and Harry Oleson returned Monday from Nuntler Three creek, where they have been working on the steel group of claims. They ran a trial of one of the lead about 20 feet and reported a splendid showing of fine steel galena ore. This property adjoins the Lead Queen group and is in the same lead.

Manager W. Hayman arrived in town last week and had samples of his "Long Licks" assayed by Tontorial Artist Jones. The results showed that there was a trace of gold, 50 cents in silver and 50 per cent lead. The lead was five to three feet long and the formation "on the square". This made "The Manager" light-hearted and he went over to the church and turned loose the organ, and there peaked forth an invitation to the baggage that delighted all the Scotchmen in town.

At a meeting held on Saturday at The Knoll, Galena, of parents and others interested in starting a public school, all the residents of Galena turned out en masse. Mr. W. Bedford was elected chairman and after discussing the situation it was decided that the building of a school house be commenced directly the bulk of the hay is harvested, when all will turn to and give a helping hand in its erection, and it was further decided that the building be ready to be opened not later than September 1st. The election of trustees was voted upon by the result that Messrs. J. M. Fraser, W. Harry and W. Bedford were duly elected, the latter being elected secretary of the board.

Frank Stockdale spent a few days in town last week.

Judge Forin will hold County Court in Wilmer Saturday morning.

Jim McLeod has cut out the Boulder creek trail and will start work on the White Cat group.

The program for the Windermere races will be printed in two colors this year. Avoid the rush for ads, on it by jangling your tongue to this office at once.

It is stated that several representatives of capital are heading this way with a view to investing in mineral claims.

Alfred and Pete Johnson called at this office Monday to subscribe for The Outcrop as they said they were prospectors and enough to know that the newspaper is a new camp was the best friend the prospectors had. They came over the Toly creek divide from Keston with one pack animal, and report the trail in very bad condition. They met McAndrews and Cusly on the trail, who advised them to turn back or at least leave their horses, but they managed to come through with their horses as Pete has made the trip several times. On the way down they went up the North fork of Toly creek and did prospect work on the Hanco and Hill Top mineral claims, which were staked in 1896. They have a shaft down 20 feet and have run a tunnel in 15 feet, and besides have two openings, one being 25 feet long and the other 15. In all these workings one is showing and in the tunnel the lead is four feet wide. They have had no assays made recently, but the ore carries good copper values and a little silver.

## FOOTBALL GAME

Windermere was invaded by a band of visitors on July 25, on which day they participated in a game of football against the whites of this district and after a hot and tough contest were defeated by a goal to two.

When the teams lined up for the first ball it was noticed that the Prudgins were represented by the following: Capt. Armstrong, P. Patmore, R. Patmore, Hart, W. McInnes, Bowman, Woods, Egan, W. Lewis, L. L. L.

The district team was composed of the Chamberlain Bros., Heston, Dr. Elliot, Dr. Morrison, Rev. McInnes, Brown, Woodland, Perkins, M. C. Connor, and Hanco.

From the outset the play was fast and furious, hot centering on the staves of the foreigners. The former kicked the leather off the ball, and the gentlemen from the May Peninsula had the inside position, but there was no time for reprieve, and at the end of the first half the game stood 1 to 0 in favor of the whites.

The feature of the second half was the strenuous manner in which the parties from Bengali and Afghanistan urged on their followers, and in a very short time they had played a couple of balls. The district men on the stretchers. But the fortunes of war were against the invaders and the game finished 1 to 0 in favor of the whites.

A handsome sum was presented to the winners by the captain of the Asiatas, and as a token of the esteem in which they are held in the district the home were the recipients of a beautifully decorated enamel loving cup.

There were present on each of the team and a tier for Capt. Armstrong and the crew of the Prudgins. It is needless to say that the brilliant play of the Prudgins made by both teams that the district can get together a representative side to combat for the Wells Cup on August 4 at Golden, and incidentally lift the cash prize.

## Hurrah For Golden!

Golden will hold two days of sports next week, starting at grey dawn Monday morning and ending Tuesday night. It is now pretty certain that a good crowd will go down from this end of the district to see and participate in various events and incidentally bring back prizes.

The Windermere District Football team will be the strongest yet put on the field to play for the Wells Challenge Cup and their friends have strong hopes of their bringing home the cup this time. The team will line up as follows: Goal, R. E. Elliot; full backs, right, W. Chamberlain; left, A. Woods; halves, right, J. B. Hewison; centre, E. N. Russell; left, B. Perkins; forwards, J. S. Hewison, H. P. Hart, G. Chamberlain, J. Blythe and P. Patmore. J. B. Hewison, captain.

As a warning to the pilgrims who will emigrate on the Prudgins Sunday morning we have scrawled a few pointers, as we have heard that Golden folks say they "can size up" Up Country people every time.

Before you leave home take a good, long look at the old folks for you may never see them again.

When you reach the city don't speak above a whisper, don't whistle, but keep very quiet for there's a man there that keeps the Sabbath day.

Monday morning "start her loss," as Sam would say. What a pity he is not going along. Golden folks mean everyone shall have a good time—"go at it."

At the start don't mistake the formation for gold dust; it is saw dust.

Up town don't stake out any pavement. It is not high grade.

Do not attempt to paint the town red. There is nothing in it, owing to excessive competition.

Don't put up too much horse talk until you can see the prizes.

Reverend of sundays, they are scarce, as vicars when captured.

The little long platforms in front of the stores, hotels and other buildings are called "sidewalks" and you will be allowed to walk on them.

Wear a plug hat, if at all possible, it may be fashionable.

Don't mistake the railway station for an ore shed, and don't be afraid of the ore, but keep off the track.

Wear white gloves at the dance, or some one might think you have hit the dirt in your time, and don't sit on the floor any other than you can avoid.

Don't let any one get drunk at you with both eyes more than three times in succession without returning the salute, or you'll conclude you are foolish.

These few points are given without any charge and if they do no harm they certainly will do no good—no more.

## Windermere Sports

The Windermere District 7th Annual Races and Sports are to be held on Saturday, August 22nd. The program has not yet been completed, owing to the committee being unable to get information as to participants in some of the events but in a few days all will be complete. However, as it now stands the program is a good one and should attract a large crowd.

Arrangements have been made with Capt. Armstrong to have the teams Prudgins arrive with the visitors from Golden and all points along the river coast on Friday, August 21st, when immediately the program will be started with a rifle shoot, golden vs. Windermere. In the evening a dramatic entertainment will be produced by local artists, which will be followed by a ball.

Saturday morning will be taken up by a football match, a six pizon shoot. In the afternoon there will be aquatic and athletic sports, games, and horse races will be arranged for on the grounds. In the evening there will be a grand display of fireworks from the standstalls and dances on the lake wharves permitting otherwise the display will be on land.

It is generally expected that this year's program will be more appreciated by the spectators than those in previous years, and the committees aim to keep the announcements going steadily from first start to the last.

## BIG LEAD 'MINE WILL START

James Condie, superintendent of the St. Eugene mine, in east Kootenay, which has been closed for many months now, pending a change in the silver-lead situation, and which is to start shipping at once under the bounty granted by the federal government, came up from Spokane on his way to Moose to commence operations at the mine.

Finding the situation in British Columbia not to his liking Mr. Condie, last summer, went north and with John A. Frost tried mining some low grade gold properties in Trinity county, California, but there have not turned out very well.

In reply to a query as to when the St. Eugene would commence operations, Mr. Condie said: "I must look over the property before I can give a definite answer but the intention is to commence work right away. It will take a little time to get some heavy machinery and the mine is large but once that is accomplished we can begin shipping immediately. After we had stopped shipping and before we closed down entirely, we spent nearly \$100,000 on development alone, so we are well ahead with our work and could ship for the next two years with our present development if need be.

ment if need be.

"Before we commence shipping however, we shall have to have a contract with the millers. I am satisfied that we will have no difficulty with Manager Aldridge of Trail. I have always found him a most reasonable man to make terms with, and particularly of late, he has done all that he could to help the silver-lead miners out of the hole they were in through the drop in the price of metals, so that some satisfactory arrangement will be come to I have no doubt.

"When last we were working under normal conditions at the St. Eugene we shipped about 2,500 tons of concentrate a month and took this we mined some 100,000 tons of ore. I think we will shortly be in a position to do this again if not a little better as time goes on, and we get a better idea of the practical working of the new bounty. I do not care to express a decided opinion about the new condition on affairs until I have had some time to think it over. The last time I was here, the duty we asked for had just been refused, and if you will remember, I said we could just as well and much better be paid to China, than eastern Canada for tariff purposes, and at the time I said it, I meant just what I said, but now, of course, it's a different matter, there is a little and of \$500,000 ahead of us, they tell me, and that for 3 years, so I'd drop my Chinese amercement scheme—for five years any-

way—and we'll see how the new plan works out in the meantime.

"Yes," concluded Mr. Condie, with a genial smile, "you can put me down as saying that the outlook for the Kootenay is now very good and that I believe the new conditions will work out satisfactorily to all concerned."—The Nelson News.

## Mint Breaks Yearly Record

The fiscal year of the United States mint at Philadelphia, just ended, was a record-breaker in the number of coins, medals, and dies struck, and the increase in the production was accomplished without any material increase in expenses. According to the report made by Superintendent Laidlaw to the Treasury Department at Washington the coinage was \$9,275,200 pieces greater than the previous year, an increase in medals of 1,012 pieces, and an increase of 2,500 dies.

About \$2,000,000 worth of coined bullion was counted and weighed as follows: gold coin, \$56,000,000; gold bullion, \$40,000,000; silver dollars, \$92,000,000; silver bullion, \$25,000,000. Besides this there was a large amount of subsidiary silver, nickel and bronze.

For the United States government \$1,001,265 pieces were coined for the provincial government of the Philippines \$1,750,000 pieces; for the Colombian government 1,200,000 pieces, and for the Venezuelan government 700,000 pieces.

The Canadian mint is away up in the clouds yet.

## GOLDEN NUGGETS

(From Our Own Correspondent.)

Golden, B. C., July 25—

Mrs. Yates, who has been absent from Golden for the last five months visiting Spokane, returned home Thursday.

His Lordship Bishop Dyer, of the Diocese of Kootenay, arrived from New Westminster on Wednesday and left for Jasper Prudgins on Friday for Windermere.

J. A. Thompson, Marine Butler Inspector, arrived in town Sunday last on purpose of inspecting the boilers of the locomotive engines at Golden, namely, the Prudgins, Fort, and Selkirk. Mr. Thompson left on Tuesday for Victoria.

O. D. Hoar has returned from his trip to the coast and says everything is looking fine at that vicinity. Mr. Hoar has gone to Revelstoke for a few days.

The sweater from the Beaver saw mill was brought into town yesterday to the Central Hospital, having been badly hurt.

Jack Nolle has returned from the Coast Lake, the trail he has had in charge being completed.

Ben, W. C. Wells passed through Golden on Thursday last en route to Victoria. It is his intention to return within a week.

County Court is to be held on the 29th of this month.

On Thursday the wedding of T. Bugden and Miss J. Bailey took place at the Queen's Hotel, Rev. Mr. Landy performing the service. The happy couple left for their home near Carbon at the same day.

Mrs. J. E. Griffith and Miss Sprague left on Wednesday on the steamer British Columbia for a trip to Victoria.

The Outcrop is on sale at A. R. Yates Drug Store, Wilmer.

Rev. Mr. E. S. G. Smith will conduct Golden church services in Wilmer on the first Sunday evening of each month.

## ST. PETER'S CHURCH FETE

Commenced:—One of the most successful functions that has been held in this valley came off on Friday night, the 17th inst., at the residence of the Rev. E. S. G. Smith.

The ladies of Windermere deserve great praise for their tact in bringing such a large crowd together every family in the immediate neighborhood being represented. There were also representatives from the surrounding towns, Wilmer, Cranberry and Atholmer, and we understand a large crowd would have come from Wilmer had there been means of transportation. Among the crowd were several distinguished gentlemen, viz., W. C. Wells, Esq., J. E. Griffith, Esq., J. C. Brady, Esq., and R. B. Bruce, Esq.

The Windermere residents were congratulated on all hands for the talent displayed in the execution of the program that had been arranged, both the singers and instrumentalists acquitted themselves in a manner that would have done credit to professionals, especially the songs rendered by Mesdames Pitts, Kington, Braham and Troyer, special mention being due to the songs "When the Heart is Young," "Darling Good Night" and "Only to Love Thee." Below is the program:

Piano Duet, "The Arms," Mrs. Kington and Mr. L. A. Braham.

Vocal Duet, "To the Woods," Mrs. Troyer and Mr. Smith.

Comic Song, Mr. Dunn.

Piano Solo, Mrs. Kington.

Song, "When the Heart is Young," Mrs. Pitts.

Duet, violin and organ, Mr. and Mrs. Troyer.

Song, Mrs. Braham.

Song, "The Minute Gun at Sea," Mr. and Mrs. Braham.

Piano Duet, Mrs. Smith and Mrs. W. Taylor.

Song, "Darling Good Night," Mrs. R. A. Kington.

Duet, violin and piano, Mr. S. Craig and Mrs. Smith.

Song, "Only to Love Thee," Mrs. Troyer.

Piano Duet, Mrs. Troyer and Mrs. Smith.

Song, Mrs. Leslie Charles.

Piano Duet, "Avalanche," Mrs. R. A. Kington and Mr. L. A. Braham.

Duet, Mrs. W. Taylor and Mrs. Smith.

Piano Duet, "Obstinate Quail," Mrs. Smith and Mr. L. A. Braham.

Song, Mr. Leslie Charles.

"Good Save the King."

The Rev. Mr. Smith's valedictory and lawn was the scene of this varied program, the lawn lighting brilliant with lamps suspended on poles and chairs and tables prominently placed on the lawn adding greatly to the weight of the event, cake, tea, coffee, ice cream and lemonade. A tent was erected on the lawn, which was much in evidence. It was attended by Mrs. Patmore, who was kept busy all evening selling fortunes to all comers, Mr. Wells being one of the first to buy.

During the program dancing was indulged in and every one seemed to thoroughly enjoy themselves, the party dispersing about 1 a.m. A charge of 25 cents admission was made and the sum of \$15 realized.

A young lady in Golden had her head in the duck corner of the parlor last Sunday night, but when her father opened the door to call out bed time, as they do down there, the missing article was found on the shoulder of a young man who happened to be present.

Mr. McPherson will conduct services every Sunday in Windermere at 11 a.m., Atholmer at 3 p.m. and Wilmer at 7:30 p.m., excepting the first Sunday in each month, when he holds service at Galena.

## MAN AND MULE

The mule—he is a gentle beast;  
 And so is man.  
 He's satisfied to be the least;  
 And so is man.  
 Like man he may be taught some tricks;  
 He does his work from 8 to 6;  
 The mule—when he gets mad he kicks;  
 And so does man.  
 The mule—he has a fond to pull;  
 And so has man.  
 He's happiest when he is full;  
 And so is man.  
 Like man he looks a patient pose,  
 And when his work's done will rejoice.  
 The mule—he likes to hear his voice;  
 And so does man.

The mule—he has his faults, 'tis true;  
 And so has man.  
 He does some things he should not do;  
 And so does man.  
 Like man he doesn't yearn for style,  
 But wants contentment all the while.  
 The mule—he has a lovely smile;  
 And so has man.  
 The mule is sometimes kind and good;  
 And so is man.  
 He eats all kinds of breakfast food;  
 And so does man.  
 Like man he bails at fancy dress  
 And all outlandish foolishness.  
 The mule's accused of dishonesty;  
 And so is man.

## THE GARDEN VALLEY

We are apt to be too much carried away with the idea that we must have large acreage in this country and forget that we can be accomplished in a comparatively small area. Anyone who has seen the Rhine and Meuse knows to what extent grape growing is carried on along their banks. Hardly a foot of soil but what is utilized, and the small patches are walled up and cultivated with a care which to us out here looks slightly excessive. All the same the finest wines come from the grapes grown on these banks and the return for labor expended is most proportionate. As connected with grapes yet been made in grape growing here, although the climatic conditions would appear to be quite as good here as along German rivers and most certainly compare favorably with the Niagara peninsula of our own land. It is true nevertheless that grape flourishes in favor in certain favorable districts where the soil, it is said, carries certain percentages of chemicals. The best eating grape grown in the open in Europe comes from the foot of the Rhine and the amount of its growth is very limited and the price is consequently high. The locality is only some 40 miles north of the northern limit of favorable grape culture in Europe. Further mention need scarcely be made of the other small and large fruits there is overwhelming evidence of the climatic conditions being unusually favorable, and in the case of the boundary, the Covert ranch has been trying grapes for some time past. Here a great industry with splendid possibilities, even in California, in the face of low prices, the prime growers of the great Santa Clara valley make good money. Dryers pay all the way from \$18 to \$25 a ton for the fruit, and three tons to the acre is a fair average crop. The results therefore are very satisfactory even where land is expensive. How much more so should the proposition be in our case, with equal possibilities for crops and better prices? The culture is intimately associated with horticulture; it should receive large attention, for with the enormous growth of clover incidental to civilization, there is in addition to the multitude of wild flowers a never failing, increasing food for the bee to feed on and, as is well known, it makes excellent honey.

The question of irrigation in the minds of all figuring on any venture in the market. When one thinks of the immense districts that are filling up with settlers between Edmonton, Calgary and Winnipeg, and the further immense extent of country north of the Saskatchewan, which, by virtue of the new transcontinental line, will draw attention and may become the homes of tens of thousands within the next decade, the question of market for fruit passes beyond the feasibility stage.  
 After all, only a few years ago the whole country comprised within the states of Minnesota, Dakota, Montana, Idaho and Washington was looked upon as being too far north for agriculture, let alone horticulture. What do we see today? Agriculture and horticulture carried beyond the dreams of the wildest imagination of a few years ago. Still later Manitoba and the North West were placed in the same position yet today Manitoba has become a factor in the world's food supply. Who can say that the limit of successful agriculture has been reached in this continent? The latitude of even southern Alaska is below that of parts of Russia and Scandinavia where people have tilled the soil for ages. So it is not wise to regard any proposition as to the settlement of lands in the far north as impossible, and the Peace river may yet support a population which will look upon the C.P.R. main line as being down south.  
 We have even today glimpses of the enormous possibilities for small fruit from the fact that Winnipeg will take thousands of cases of strawberries and raspberries at very fair figures; as a result large shipments are being made. The bulk of the fruit crop of the Okanagan last year went to the North-West, and the output of large areas has been contracted for. It is well known that the very best Ontario apples go to Europe. The result of this is that the shipments to the west are invariably of a poor grade. And therefore British Columbia has the opportunity of supplying all the great west, and the Winifred district should supply a good portion of the fruit.

Idaho and Washington was looked upon as being too far north for agriculture, let alone horticulture. What do we see today? Agriculture and horticulture carried beyond the dreams of the wildest imagination of a few years ago. Still later Manitoba and the North West were placed in the same position yet today Manitoba has become a factor in the world's food supply. ## HE STOPPED THE PAPER

I've stopped my paper, yes I have; I didn't like to do it, But the editor got too smart, And I follow he'll rue it.

I am a man as you have heard,  
 And I won't be insulted,  
 So when an editor gets smart,  
 I want to be consulted.

I took the paper eleven years,  
 And helped him all I could, sir,  
 And when it comes to darning me,  
 I didn't think he would, sir,  
 But that he did, and you know it,  
 It made me hot as thunder;  
 Says I, I'll stop that sheet, I will,  
 If he doesn't thing goes under!

I turned up the newly whelp  
 And for his cowardly paper,  
 I read the eleven years no light!  
 You, sir, I've stopped his paper.
